

## Appendix B: Place codes

### Latin American Migration Project (LAMP) Dominican Republic

The following lists provide **state-specific codes** for all **place** variables in the Dominican Republic, and MSA codes for places in the United States. This means that, for Dominican places (municipios), the meaning of the place code is dependent on the corresponding state (province) code. The lists are divided into four sections: generic codes; Dominican places, U.S. places; and places in other countries.

#### IMPORTANT!!

To protect our subjects' confidentiality, we are not revealing certain state and place codes —see "Generic" codes below. For each given community, all state variables corresponding to the state (province) where the community is located are coded as zeroes, and so are the corresponding place variables.

#### Generic

For all place variables, there exists a set of commonly used codes:

0000	Concealed code (to protect confidentiality)
8888	Not applicable
9999	Unknown/missing

US-specific generic code:

7777	Existing location, but outside of established MSA.
------	--

Note: The *Generic* place codes are the only geo-codes that are *not* state-specific.

#### Dominican Republic

The place (*municipio*) codes for Dominican Republic refer to town identification numbers that are specific to each Dominican Republic state (*provincia*).

**United States**

The place codes for the United States refer to metropolitan-statistical-area FIPS codes, as assigned by the Office of Management and Budget (OMB) in 1993. These codes, although not dependent on a single state code like Dominican codes, are only applicable when the corresponding state variable falls within the range of 100 to 199.
