

Latin American Migration Project (LAMP) - Dominican Republic
HOUSE_SP data file: Variable list and specifications

One of the surveys carried out in the Dominican Republic (COMMUN=7) contained additional forms for information on migration to Spain. The _SP files include all data collected in that community: the standard variables that can also be found in the larger database LAMP-DR7, as well as specific data on Spanish migration. In addition to the Dominican and US samples, this file also includes data from a sample of 15 migrant households interviewed in Spain (SURVEYPL=4).

Listed here the user will find the variables that are **unique to this file**. For all the standard HOUSE file variables, see the Dominican codebook for HOUSE file.
