- (1) Household count \* (eligible visited / total visited)
- (2) Confirmed residential dwellings whose residents could never be found or who were unable to respond to the survey in a coherent manner.
- (3) Empty house or under construction and uninhabited
- (4) Incorrectly judged to be an independent household
- (5) As reported by neighbors, the household residents were in the US at the time of survey. No one was living in the house during their absence. Had someone living in the house, that person would have been interviewed.
- (6) Institutions such as a school, a nursing home, a government office, etc.
- (7) Interviewed households / estimate of eligible households
- (8) 1/ Sampling fraction
