

Appendix A: Sampling information

Latin American Migration Project (LAMP)

Haiti

Any randomly selected dwelling in the survey area was considered an eligible household for the interview unless it met any of the following conditions:

1. It was uninhabited.
2. The head was foreign-born, i.e. not Haitian.
3. It was exclusively a business locale.
4. It housed an institution, such as a school, a nursing home, a government office, etc.

Among selected eligible households the following were not interviewed:

1. Those whose residents refused to respond.
2. Those whose residents could never be found, despite repeated visits on different days and at different times.
3. Those whose residents were unable to respond to the survey in a coherent manner.

Table A1 below shows sampling information for the LAMP-HA survey.

Notice that weights depend on the survey site. Variable WEIGHT, included in all data files corresponds to the weights shown in Table A1. We recommend the use of weights for the computation of descriptive statistics.

Table A1 - Sample Statistics
Haiti, LAMP-HA3

Indicators	Community number			Total
	1	2	3	
total households in the survey area (count)	405	384	352	1141
estimate of eligible households (1)	271	283	294	848
visited households	241	152	133	526
eligible	161	112	111	384
interviewed households	100	100	103	303
dismissed (2)	34	1	1	36
refusals	27	11	7	45
ineligible	80	40	22	142
uninhabited (3)	30	17	7	54
foreign-born head	1	1	0	2
business only (non-residential)	29	9	10	48
does not exist (4)	10	1	1	12
in the United States (5)	0	0	0	0
other ineligible (6)	0	12	4	16
selected ratios (in %)	1	2	3	Total
total visited / total counted	59.5%	39.6%	37.8%	46.1%
interviewed / total visited	41.5%	65.8%	77.4%	57.6%
ineligible visited / total visited	33.2%	26.3%	16.5%	27.0%
eligible visited / total visited	66.8%	73.7%	83.5%	73.0%
uninhabited / total visited	12.4%	11.2%	5.3%	10.3%
foreign-born head / total visited	0.4%	0.7%	0.0%	0.4%
business only / total visited	12.0%	5.9%	7.5%	9.1%
does not exist / total visited	4.1%	0.7%	0.8%	2.3%
other ineligible / total visited	0.0%	7.9%	3.0%	3.0%
refusals / total visited	11.2%	7.2%	5.3%	8.6%
dismissed / eligible visited	21.1%	0.9%	0.9%	9.4%
refusals / eligible visited	16.8%	9.8%	6.3%	11.7%
refusals / (interviewed + refusals)	21.3%	9.9%	6.4%	12.9%
Sampling Fraction (7)	0.3690	0.3534	0.3503	
weights				
domestic sample weights (8)	2.7100	2.8300	2.8544	

- (1) household count * (eligible visited / total visited).
- (2) confirmed residential dwellings whose residents could never be found or who were unable to respond to the survey in a coherent manner.
- (3) empty house or under construction and uninhabited.
- (4) incorrectly judged to be an independent household.
- (5) As reported by neighbors, the household residents were in the US at the time of the survey. No one was living in the house during their absence. Had someone been living in the house, that person would have been interviewed.
- (6) institutions such as a school, a nursing home, a government office, etc.
- (7) interviewed households / estimate of eligible households
- (8) 1/sampling fraction
