

## Appendix B: Place codes

The following lists provide state-specific codes for all place variables. This means that, in most cases, the meaning of the place code is dependent on the corresponding state code. The lists are divided into four sections: Generic codes; Haitian places; U.S. places; and other (foreign) places.

### Generic

For all place variables, there exists a set of commonly used codes:

0000 Concealed code (to protect confidentiality)  
8888 Not applicable  
9999 Unknown/missing

US-specific generic code:

7777 Existing location, but outside of established MSA.

Note: The Generic place codes are the only geo-codes that are not state-specific.

### Haiti

The place (Arrondissement) codes for Haiti refer to town identification numbers that are specific to each Haitian state (departament). (Departamento code in parentheses).

## The United States

The place codes for the United States refer to metropolitan-statistical-area FIPS codes, as assigned by the Office of Management and Budget (OMB) in 1993. These codes, although not dependent on a single state code like Haitian codes, are only applicable when the corresponding state variable falls within the 100-199 range.
