URUGUAY
MIG File

Description

MIG is a cross-sectional file for each head of household that migrated internationally.

MIG Variables

MIG file contains 803 observations and 382 variables. MIG is a cross-sectional file containing measures of economic and social activity during the last trip abroad of each [informant] migrant to Uruguay.

Once the PERS file is constructed, we only selected informants who reported at least one trip to Uruguay. From PERS, we bring to MIG the person's background information from table A and international migration information from table C, and then merge all the following variables:

- Migratory experience of family-of origin of head of household (table G1).
- U.S. migration experience among extended family and friends (table G2).
- Social, employment, and financial characteristics during the last migration trip to Uruguay (tables H1, H2, and H3).
- Migration motivations and future plans (table K).

Do not forget to download the Ethnosurvey from our page in order to obtain specific tables and questions.
