

URUGUAY

PERS File

Description

PERS is a cross-sectional file for every person who appears in table A.

PERS Variables

Uruguay – PERS file contains 2219 observations and 109 variables. PERS is a cross-sectional file that provides general demographic characteristics and information on domestic and international migration of every person reported in the ethnosurvey.

Variables found in this file are:

- Demographic information such as age, gender, relationship to head of household, marital status, and current economic indicators (table A).
- Characteristics of first and last trip international trip (table C).
- Wages on first and last trip in Uruguay for informant and spouse only (tables Fa/Fb).
- Migration adjustment status in Uruguay (table C2).
- Health variables collected only for informant and his/her children who are minors and household members (tables I1 & I2)

Do not forget to download the Ethnosurvey from our page in order to obtain specific tables and questions.

PERS Data File: Variable list and specification
